(54) Title: PRODRUGS BUILT AS MULTIPLE SELF-ELIMINATION-RELEASE SPACERS

(57) **Abstract:** This invention concerns multiple release spacers and spacer systems, which release multiple leaving groups following a single activation. It concerns compounds comprising a specifier linked to two or more of the same or different leaving groups (L in the figure) via a self-eliminating multiple release spacer or spacer system, which compounds upon a single activation step, in particular removal or transformation of the specifier, release at least two leaving groups.
